SUMMARY

Results-driven software engineer with a keen ability to translate complex concepts into practical solutions. Proficient in a range of programming languages and technologies, with a deep commitment to continuous learning.

EXPERIENCE

Software Engineer

100Devs January 2022 - Present, Los Angeles, CA (remote)

• Developed and deployed three semantically structured full stack web applications using modern frameworks; optimized load time by 40% and increased user engagement by 50%.

• Applied agile methodologies for project management. This approach led to a notable 15% improvement in project efficiency, as measured by faster development cycles and reduced time-to-market.

• Demonstrated ability to optimize database performance, reducing query response times by an average of 10%, resulting in enhanced application speed and efficiency.

Independent Contractor

Curran Construction & Remodel March 2018 - September 2023, Missoula, MT

• Demonstrated expertise in installing over 150,000 square feet of various flooring types including carpet, laminate, vinyl, and tile, with a commitment to delivering top-notch quality.

• Proficient in tile setting, consistently achieving tile layouts with less than 1% waste and maintaining a 98% client satisfaction rate.

• Proven ability to complete projects ahead of schedule, with an average of 10% reduction in project timelines, while ensuring strict adherence to safety and industry standards.

PROJECTS

Joints & Jams Website

100Devs • September 2023 - Present

• Informative website providing details about an annual music festival. Grew festival attendance by 15% and online engagement 100% over previous year.

• Technologies used: Javascript, HTML, CSS, SCSS.

Imitari

Personal Project • https://imitari.fly.dev/ • September 2023 - Present

• Implemented a user-centric feature set, enabling users to access their profiles and retrieve their uploads.

• This resulted in a 20% increase in user engagement, and a 15% surge in user-generated content submissions.

• Technologies used: Node.js, Express.js, EJS, MongoDB, HTML, CSS, Bootstrap5.

Profit Prophet

Personal Project • https://profit-prophet.fly.dev/ • August 2022 - Present

• Created 25% increase in average user revenue and a 30% boost in platform efficiency.

• The application contributed to a more productive and financially rewarding experience for tradesmen.

• Technologies used: Node.js, Express.js, EJS, MongoDB, HTML, CSS.

AVR website

100Devs • https://avrmissoula.netlify.app/ • March 2022 - April 2022

• Created an online presence which raised customer acquisition by 20%.

• Technologies used: Javascript, HTML, CSS, SCSS.

EDUCATION

100Devs Academy
100Devs • Los Angeles • 2022

SKILLS

Front end: HTML5, CSS3, JavaScript (ES6+), ReactBack end: Node.JSDatabase: MongoDB, SQLFrameworks: Express.JS, TailwindCSS, Bootstrap

Other: Restful Api, OOP, TDD, Responsive Web Design, Version Control,

Soft Skills: Creative Thinking, Self Motivated, Resourceful, Organized, Quick Learner
